

Name:

Round

Heat

Task B: Last 2 flights, 3 min max

Last 2 flights only, 3 min max per flight, score only the last 2 flights

5 min prep time, 7 min working time, 30 sec landing window, 2 min spare working time

Unlimited launches

Record all flights, only the last 2 flights will be scored

Timing stops at the buzzer at the end of the 7 min working time if there is a flight in the air

Record times in min:sec up to the 3 min max, example: 3:00 or 1:02 Record all flights. Mark an **X** for off-field landing and / or penalties

time min:sec (max = 3 min)											
X for off-field landing											
X for penalty											

score in sec official use only

Record times in min:sec up to the 3 min max, example: 3:00 or 1:02 Record all flights. Mark an **X** for off-field landing and / or penalties

Pilot / Timer tactics: This task emphasize the ability to fly two long flights in a row (3 min max for each flight)

Pilot flies two flights

Timer records scores

If the pilot decides his time can be bettered by him bettering his second to last flight, he declares to timer he is going to fly again, then flies

Timer records score

And so on and so forth, until pilot decides his last 2 flights are the best he can do

All flights will be recorded, only the last 2 flights will be scored

Timing stops at the buzzer at the end of the 7 min working time if there is a flight in the air

Be careful to not fly if the remaining window time is such that one can not better the flight before the last one

Since there is 1 min spare working time, it may be to the pilots advantage to watch for others in good air in order to choose a flight path

Similarly the extra working
